

Student has 7 minutes to complete this exam

grade ___/5 & comment if issue

0 1 2 3 3.5 4 5
 unacceptable poor developing acceptable good excellent

Basics /15

- Introductory statement** (___/5)
- Explain procedure to patient** (___/5)
- Obtain informed consent** (___/5)

Movement /45

- Correct use of space to observe natural gait** (___/5)
- Begins procedure with full body observation** (___/5)
- Organized progression of observation** (___/5)
- Demonstrates understanding of basic gait theory**
 - **Stride, step & cadence** (___/5)
 - **Stance phase (heel strike, mid stance, toe off)** (___/5)
 - **Swing phase (initial, mid, terminal)** (___/5)
 - **Pelvic motion** (___/5)
 - **Spinal motion** (___/5)
 - **Upper limb motion** (___/5)

Regions examiner will note /15

- Anterior view:** foot fall – pronation/supination, toeing in/out, bowing tibia/fibula, patellar alignment, hip rotation, lateral pelvic tilt/shift, pelvic rotation, arm swing, trunk/shoulder rotation, head (___/5)
- Lateral View:** foot fall, stride length, gait length, plantar flexion/dorsiflexion of foot, rib movement, arm swing, spinal curves, head (___/5)
- Posterior view:** heel position, heel strike, hip movement, pelvic motion, arm swing, trunk rotation, head (___/5)

Overall /25

- Provided a comprehensive summary (HIPMNRs)** (___/5)
- Overall charting/recording performance** (___/5)
 Legible, clear enough for next clinician to clearly understand findings
- Effective, confident, professional demeanor** (___/5)
- Lack of prompting** (___/5)
- Time management** (___/5)
